7.1.7 Initiatives taken by the institution to make the campus eco-friendly (at least five)		

Energy Conservation:

- Notices regarding switching off fans, tubes and electrical appliances when not in use are placed throughout the campus to avoid wastage of energy.
- The architecture of the college buildings is such that maximum advantage of day light can be taken.

Use of renewable energy:

- Solar water heaters have been fitted in all hostels and guest houses. The capacity of solar water heater system is 18 KW with total number of panels 48. Around 3000 lit. of hot water is made available through system.
- Biogas plant has been installed in campus which utilizes around 160 kg of food waste from hostels. The capacity of this plant is 20 m³. Bio gas thus generated is used for cooking in hostels.

Water harvesting:

- On campus three plants of water harvesting are in operation. Each plant can recycle around 3000 lit of water daily. In Monsoon season plant can accommodate 1,40,000 lit of rain water.

Check Dam Construction:

- Our college is in city premises so the activity of check dam construction is carried out in kalyan village through NSS.

Efforts for Carbon neutrality:

- Use of Bio sanitizer technology for garbage composting in campus– Oxygen rich water, treated with bio sanitizer is sprayed on garbage heap to ensure eco-friendly bio-conversion in to compost. In this process, there is no heat generation and minimal emission of green house gases.
- The capacity of this plant is 6 ton per six month.
- Dry leaves and waste papers are not allowed to be put on fire in campus.
- Encouraging staff and students to use stairs instead of elevators.

Plantation:

- Tree plantation is carried out in campus every year as an activity of NSS.
- Old tree count is approximately 100.
- Native tree count is approximately 1900.

Hazardous waste management:

- Hazardous waste from Chemistry lab is disposed with due precautions

E-waste management:

- E-waste is collected and given to authorized agency (SWaCH) for dismantling and recycling as per NPCB norms.
 - SWaCH had conducted E-waste and Plastic waste collection drive on campus on 1st Sept 2017. E-waste of ~30 kg and plastic waste ~3 kg was collected.

7.2 Best Practices

Describe at least two institutional best practices:

Best Practice 1:

- **Title: “Innovation, Employability Skills Enhancement and Career Building Program”- an initiative under Cummins Signature Project**
- **Objective:**
The objective of this practice is to provide training to third year students of all branches to enhance employability skills, innovation ability. The program also aims to help students in overall career development.
- **The Context:**
After graduation, when students enter the engineering profession, in addition to domain knowledge, other skills and abilities such as communication skills, leadership, innovation, team building are very much required to become successful in the profession, which are not directly covered in the curriculum. To address this need a unique certificate course on Innovation, Employability Skills Enhancement and Career Building is designed which focuses on Self Awareness, Professional Skills, Innovation and Communications.
- **The Practice:**
The 40-hour course was introduced from academic year 2013-14 for third year students for all the branches of engineering. Students are divided in five batches. In a week, each batch attends one session of two hours duration. Total 20 sessions are planned throughout the academic year for all batches. These sessions include as follows
 1. Icebreakers, Introductions, MOOCs, Opportunities Abroad
 2. Mind map- Theory, Individual Mind map, Group Mind map
 3. DBDA and psychometric Test Administered
 4. Creativity Workshop
 5. DBDA and Psychometric Result Discussion
 6. Video Analysis and English Language Tips
 7. Transactional Analysis (TA) and Presentation Skills
 8. Corporate Grooming +Business Ethics
 9. Project Selection and SWAF Analysis (JW Skipped since it was done in 2nd year)
 10. Team Building Games
 11. Effective Resume Writing Theory
 12. Profile building, Innovation(IP) and feedback (Resume Book Distributed)
 13. Review and Interview Theory
 14. 6 Thinking Hats workshop
 15. HR and Technical Round 1 (with External Evaluators)
 16. HR and Technical Round 2 (with Industry experts)
 17. HR and Technical Round 3 (with industry experts)
 18. Aptitude Test Prep Tips and Aptitude Test delivery
 19. GD theory and GD Round
 20. Conclusions, SOP Tips and Feedback

At the end of the training Program, every student gets course completion certificate.

- **Evidence of Success:**

Assessment of the students is carried out at the end to understand the impact of the program which is conveyed to the students individually. Following generalised statements can be drawn on the basis of students' feedback.

- The course is observed to help students improve their skills such as individual report writing, creative and strategic thinking etc.
- There is a noticeable positive change in the overall personality of the students who have completed this course.
- As a direct consequence of the innovation aspect of the program, 15 students have filed patents till date. This is a key differentiator, giving the students an upper edge as they embark on their search for careers in the industry or pursue higher education in India or overseas.
- Mock interviews and group discussion sessions conducted under this program have resulted into positive feedback from the companies visiting the campus.

- **Problems encountered and resources required:**

This program is sponsored by CIL, under its Signature project initiative and hence offered to the students without charging fees.

This program needs to be planned beyond the students' regular academic engagements. Hence, it becomes challenging to identify free time-slots for large groups of students.

A separate faculty coordinator had to be assigned for the smooth conduction of the program.

The college has made an auditorium available for all the sessions and to all the batches.

Best Practice 2:

- **Title: Faculty Development Schemes**

- **Objective:**

The objective of the practice is to motivate the faculty members to do research, organize and attend conferences, workshops, seminars and symposia to get to know emerging technology trends and also to update their domain knowledge.

- **The Context:**

For effective teaching as well as research engagements, faculty members are expected to have holistic idea of their area of specialization. To accomplish this, they require exposure to various inter-faculty interactions taking place via conferences, workshops, seminars, symposia etc. This situation is addressed by introducing various faculty development schemes.

- **The Practice:**

Research and Development Committee of the institution promotes and facilitates research undertakings of the faculty members. The faculty members are sponsored by the institute to attend the national / international conferences. To encourage quality research work by faculty members, various monetary incentives are in place. If the paper gets published in Scopus indexed journals, faculty gets reward of Rs.5000/-. If the faculty member receives grant from funding agencies, then 5% of the grant amount is rewarded to the faculty member by the institute. Faculty members pursuing Ph. D. programs are provided with two years of fully paid study leave from the institute.

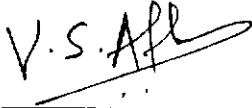

- **Evidence of Success:**

- Enhancement in the number of faculty members registering for Ph.D. programs
- Enhancement in the number of quality publications by faculty members
- Increase in the number of workshops, seminars attended by the faculty members
- Increase in the number of faculty members implementing best pedagogic practices
