

Summer Internship

- As per the academic curriculum, students are required to undergo Summer Internship, on completion of their Third Year and before the commencement of Final Year.
- The duration for Internship is minimum of 8 weeks and maximum upto 12 weeks.
- Internship exposes a student to best practices in the industry, knowledge in their respective domain, professional technical skills, real world challenging problems and soft skills.
- During the internship, students are expected to work with the organization on a significant project or complete significant work assignments. The internships may take different forms like short projects, solving real world problems with technology, work assignments, learning technical tools, hands-on experience in new domains, use of technology to support business processes and many more.
- Companies approach the Training and Placement department for offering internships. Through the selection process many companies offer summer internships to the students. Faculty members of the department also contribute towards getting summer internships at industries for the students.
- Department offers special project/training program for the students who do not get internships from the industry.
- For the year 2019-20, 51% students got internships in various companies. Maximum stipend offered was Rs. 80,000 per month by Microsoft.
- For the year 2020-21, 70% students got internships in various companies. Maximum stipend offered was Rs. 1.5 lakhs by DE shaw.
- For the year 2021-22, 90% students got internships in various companies. Maximum stipend offered was Rs. 1.5 lakhs by DE shaw.
