

## Environment & Energy usage Policy

### Objectives of the environment & energy usage policy:

- To limit usage of natural resources.
- To provide sustainable solutions.
- To control Energy Consumption.
- To sensitize all stakeholders about environmental awareness to conserve natural resources.

### The Policy Statements are as follows:

- To install photo-voltaic solar panels for the generation of alternative energy.
  - Cover roofs of each building with solar panels for generation of solar energy.
- To adopt methods for water recycling and rainwater harvesting
  - To develop systematic waste water management mechanisms.
  - To develop a rain water harvesting unit.
- To restrict entry on automobiles inside the campus & build pedestrian friendly pathways.
- To install LED bulbs in the campus to save energy
- To take additional measures to continuously improve energy consumption.
  - Switch off lights & fans when not in use.
  - Shut down the computers when not in use.
- To take initiatives to engage employees & students to contribute to environment protection and conservation.
  - To undertake tree plantation drive at least once in a year.
  - Encourage plastic free zones on campus.
